2.1. Procedure

Title: A-SMGCS system with associated surveillance infrastructure for the Belgrade ATC Tower - Phase 1

Description: The project includes the procurement and implementation of an Advanced Surface Movement Guidance and Control System (A-SMGCS) with associated surveillance infrastructure for the Belgrade ATC Tower. This includes the implementation of one Surface Movement Radar (with antenna tower and radar shelter), a Multilateration system covering the airport (Ground Multilateration) and central Serbia (WAM Central Serbia), and a vehicle tracking system. The system will provide A-SMGCS surveillance services alongside with an Electronic Flight Strip and basic Airport Safety Support services (RMCA). The implementation will also include integration of existing SMATSA and airport systems into one integrated tower solution. The system must enhance safety and efficiency through automated surveillance, improve situational awareness for air traffic controllers in all weather conditions, and comply with all relevant EUROCAE standards including but not limited to ED-116, ED-117A and ED-87E.
